# Column Editing

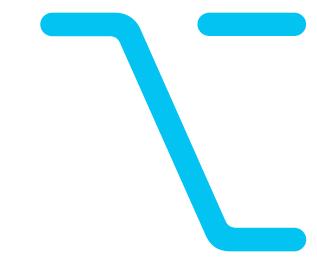

- Ⓐ To select a column above or below the cursor, use the  $\wedge \uparrow \downarrow$  or  $\wedge \uparrow \triangle$  key combos.
- Ⓑ Hold down the option  $\swarrow$  key and drag to select a column with a mouse or trackpad.

```
struct Employee {  
    let idNumber: Int  
    let firstName: String  
    let secondName: String  
}
```

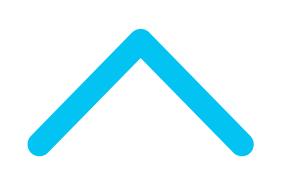

```
struct Employee {  
    let idNumber: Int  
    let firstName: String  
    let secondName: String  
}
```
